

The University of Oklahoma offers complete, practical, up-to-date blowout prevention courses for both land and subsea applications. Course materials feature the latest methods for increasing operational efficiency, reliability, and safety as well as new technology.

All blowout prevention courses and workover well courses are conducted by experienced, full-time instructors, and technical support is provided by the University of Oklahoma School of Petroleum and Geological Engineering. The classroom learning experience is enhanced through the use of hands-on simulation training, audiovisual aides, and a comprehensive training manual specific to each course. Classes are held on the Norman campus of the University of Oklahoma.

Special On-Site Group Arrangements

The University of Oklahoma Blowout Prevention School will conduct classes at a customer's local facility upon request. These courses can be custom-tailored for specific requirements or conducted using standard class material. You need only provide a suitable classroom equipped with marking boards, projection screen, video player or 16mm optical sound projector, and 35mm slide projector. The University of Oklahoma will furnish the instructors, simulators, and manuals.

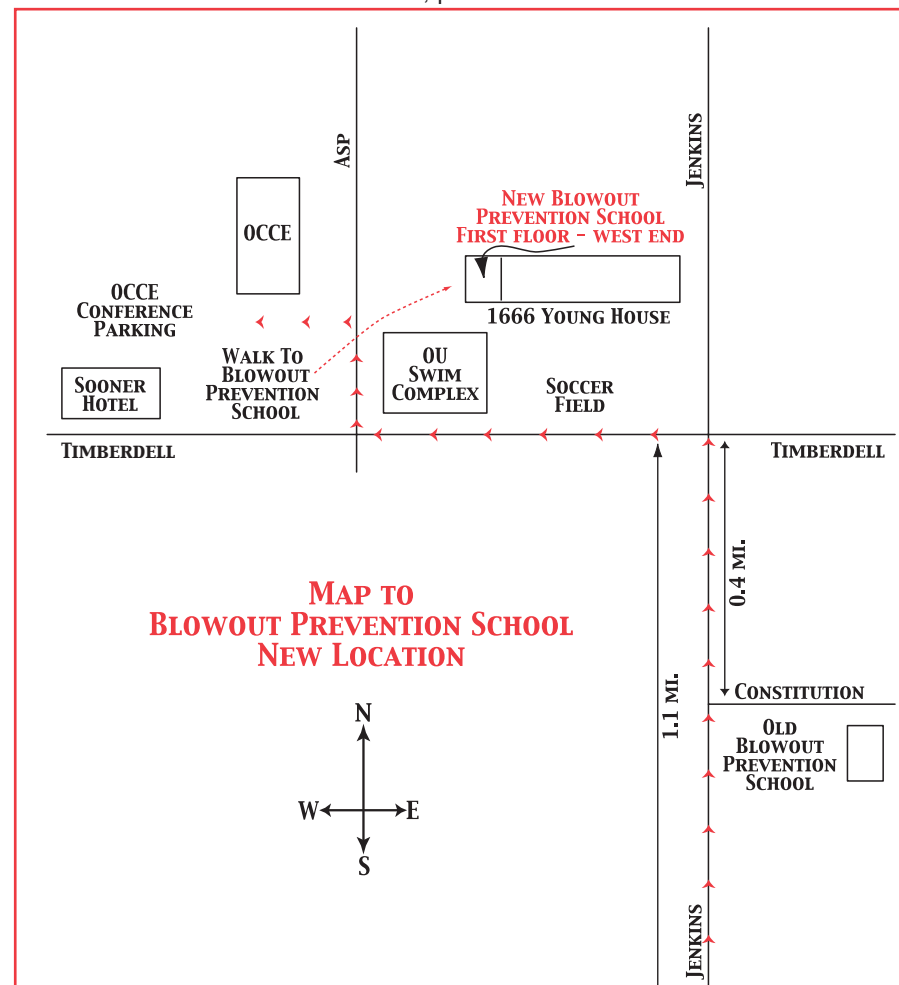

For more information on special on-site group sessions of the Blowout Prevention School, please call the number listed below.

How to travel to the OU Blowout Prevention School from I-35 north or south:

1. Take exit 108-A - Highway 9 east to the stoplight at Jenkins Avenue.
2. At Jenkins Avenue go north (left) to Timberdell. Turn left (west) and go to Asp Avenue.
3. Park in the OCCE Conference Parking Lot, second entrance, and follow the walk to the new site of the Blowout Prevention School.
